

mini

500, 1000

Mini is the smallest of our sprayers, but with such a small size surprises with the convenience, power and variety of applications. Mini works everywhere and only depends on you how to use it creatively.

master ergo

1000, 1500, 2000, 3000

We have created Master Ergo sprayer for gardening enthusiasts, but its smart solutions will also be appreciated by professional users. The ergonomics of use, the smoothness of shape and its unique features make us proud of it.

hobby

5, 7, 9, 12

If you are just starting your adventure with the garden, Hobby sprayer will be perfect for you. It has a part of our most advanced solutions and the possibility to use each of our lances makes it the best choice for the start.

profession

5, 7, 9, 12

Profession sprayers are our oldest family of products, and their evolution was based on the knowledge and experience of gardeners and farmers. Their needs were shaping the solutions and equipment in the Profession sprayers. Now everyone can draw on their knowledge, because the Profession has everything you expect, and most importantly it will never disappoint you.

profession+

5, 12

Can one device have everything? Yes. Profession+ is like a Swiss army knife. Multifunctional, richly equipped, much more to do with it. In one package you get everything you expect from a sprayer.

titan

12, 16, 20

If you need equipment for serious work, Titan will prove perfect. Large capacity, comfort of usage and patented solutions – all for you. With Titan sprayer you can work and not feel you do it.

LIGHTWEIGHT

Our sprayers are light and handy. Minimizing the weight of our products we make the work more comfortable and using the best materials our sprayers retain greater durability with minimum weight.

3D FLEX

3D Flex is a construction that gives more flexibility of use. Sprayers with 3D Flex can work in any position, even with the tank upside down. Thanks to this solution you will reach even the most inaccessible areas with great ease.

EFFICIENT PUMP

The pump was constructed with the help of computer simulation tools, analyzing the tension of the material, thanks to which we obtained a light and durable pump. The handle has been adapted to the shape of the hand, which guarantees a secure grip when pumping, minimizing tiredness.

LONG WARRANTY

Our high-pressure tank ensures the highest safety of use. A special method of its production and a several-stage quality control process guarantee a long working life and safety.

BUILT-IN STIRRER

A specially designed mixer, used in profession+ sprayer, during each pumping mixes a solution used for liming, preventing its delamination. This simple appliance guarantees always perfectly mixed lime solution and ensures its even application.

GLASS VALVE SYSTEM

The glass elements in the pump valves (GVS) ensure the chemical resistance and long-term operation of the pump. Glass is a material not reacting with chemical agents, that is why we used it in our patented pump construction.

ADJUSTABLE NOZZLE

Nozzles in our sprayers have a smooth regulation of the spraying angle from a wide spray to a single stream. All you need is one nozzle that can be used for both watering and misting.

AUTO LOCK

The autolock button on the Marolex handle makes work more comfortable. It reduces the strain on the hand muscles during long work with the sprayer. The trigger button pressed and moved forward gets blocked in the open position without having to press it during spraying.

REINFORCED HOSE

All hoses in our sprayers have additional internal reinforcement, increasing resistance to pressure and external factors. They are resistant to bending, cracking and stretching. The three-layer construction makes quality without compromise.

LANCE SEALING

All telescopic lances are equipped with dust protection system APS, preventing the entry of dirtiness between the lances. Thanks to this solution, they are considered to be one of the most reliable devices of this type on the market.

HIGH FLOW VALVE

The used ball valve allows free liquid flow so viscous and dense solutions can be sprayed. Liming and impregnation with this sprayer are much simpler and faster due to high flow efficiency.

SOFT BELTS

Marolex focuses on ergonomics and user's comfort, which is why we have created soft, waterproof carrying straps that guarantee right fitting to the shape of the body. Smooth regulation allows you to adjust the length of belts optimally to different height and size of the user's body.

movi

16

We all like how it's light and easy. The Movi sprayer does not have to be carried. This sprayer runs slightly and is very maneuverable, and its capacity is a surprise for many people. If you need a serious tool and the highest comfort, choose the Movi sprayer.

ADJUSTED GRIP

At Marolex we understand the needs of different users therefore the height of the grip in the Movi sprayer can be adjusted to your height. The correct grip setting reduces the effort and takes care of your spine.

STABLE WHEELS

Wide and durable wheels guarantee stability and easy movement on various surfaces. The polished surface structure of wheels ensures that the sprayer does not get stuck in loose ground or slides on wet grass.

RX

12

Turn it on, put it on your back and forget about restrictions. With the RX battery sprayer, you get everywhere, and the built-in battery will allow you to have an amazingly long work without charging.

ELECTRONIC SECURITY

The microprocessor in our sprayers is responsible for control, safety and optimization. Thanks to advanced algorithms, sprayers use batteries more efficiently, save energy so that you can work longer.

CONSTANT PRESSURE

Changes are important, but sometimes stabilization is needed so we have equipped the RX sprayer with the expansion tank to ensure the pressure is stable and never fall.

VX

20

Our biggest sprayer is simply impressive. Over average capacity, exceptional mobility, powering supply to our biggest battery, and above all, an efficient pump. The VX sprayer is pure power and no compromises.

FAST CHARGING

Our modern batteries are ready to use whenever you need them. The quick charger limits the charging time to the necessary minimum. We value your time therefore instant charging is our standard.

TRIPLE FILTRATION

Filtration is crucial for intensive spraying. The electric series sprayers have a 3-stage filtration that protects nozzles and ensures perfect spraying.

fx

7

From the very beginning, we wanted to create a sprayer that will be light and battery-powered. With the FX you will discover a whole new dimension of work. It weighs only 4.2 kg and its battery lasts for over 3 hours of continuous work. Most of all you can very easily exchange the batteries and keep on working.

LI-ION POWERED

Our sprayers are evolving together with the latest technology, which is why we use the most modern power sources in them. Lithium-ion batteries were created to minimize weight and use the available energy most efficiently.

FAST CHARGING

Is 3 hours a lot? In our opinion it is too much, because during this time you can spray over 200 liters that is nearly 30 tanks without a single charge.
